

# ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

000104665

**Date/Time:** April 29, 1999 / approximately 9 30 a m

**Site Contact(s):** Bob Cathel **Phone:** 966-6880

**Regulatory Contact:** Chris Gilbreath **Phone:** 692-3371

**Agency:** Colorado Department of Public Health & Environment

**Purpose of Contact:** Discussed progress and status for several on-going projects

## Discussion

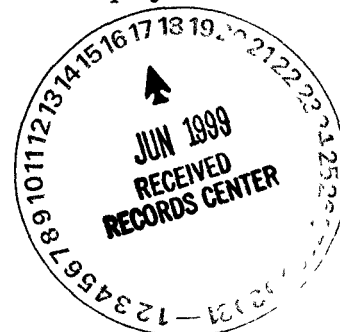

A meeting was held with Chris Gilbreath (CDPHE) to discuss status of several projects  
The topics of discussion and meeting notes follow

## Meeting Notes

**Meeting with CDPHE (Chris Gilbreath)**

**June 10, 1999**

**Start - 9:00 a.m. End - 9:45 a.m.**

**Attendees** Randy Leitner, Ted Hopkins, Bob Cathel, Mike Conlogue and Kathy Zbryk

### • **Fume Hood Characterization**

#### Action items

- Determine coupon analytical testing process (i e , how was the drain cover-plate analyzed?) Mike Conlogue
- Review the process knowledge regarding what wastes were actually stored in these fume hoods (include WSRIC and WEMS in the review) Mike Conlogue

### • **B865/883 Ancillary Structures**

#### The structures in question include

- Makeshift carpenters shop, associated shed roof, and four cargo containers
- Sutton extrusion Press switch-gear house
- Sutton Extrusion Press fire suppression system
- Cargo containers storing records
- CO<sub>2</sub> cleaning equipment

1/2

It was discussed that a walk-down of these structures should be set-up with CDPHE next week (Chris will inform us regarding his availability)

Big picture item discussed was the formulation of either a white paper or RSOP to differentiate facilities that are in the "gray-area" of Type I and maybe include a clarification in the DPP Small picture Gary Konwinski needs to prepare a disposition plan for the structures that he plans to remove and Chris would like to be involved in a scoping meeting process prior to document generation

- **776/777 Sludge**

There currently exist two cans of mixed residue sludge, which are being stored in a glovebox in B776/777 An Interim Storage Area (ISA) needs to be established for this waste The following information will be requested from B776 environmental personnel to develop the ISA request

- 1 Develop justification of why we need to store here and description of the material
- 2 How will it be processed/disposal path
- 3 What is the length of the storage
- 4 Will it be moved in the meantime

- **White Paper re: Slab Removal**

It was discussed that RFETS personnel draft a position paper (white paper) regarding standards for slabs left in the ground, after the removal of a facility or structure The position paper should include discussion regarding what is protective of human health and the environment and what makes sense (i.e., based on environmental restoration [ER] goals) Also, part of the white paper should include a "big-picture" view of when or if ER will really be active
